

# Empowering Queensland's Youth through JT Academy

At Queensland Computers, we understand that the youth of today are the leaders of tomorrow. Our dedication to empowering Queensland's youth is exemplified through our partnership with JT Academy. By actively engaging with the academy, we're committed to addressing the challenges faced by schools across the region, especially in encouraging participation and attendance of disadvantaged students.

Listening to the concerns and barriers shared by schools, we've taken concrete steps to bridge the digital divide and support better educational outcomes. Our major contribution to these efforts is the donation of devices to the value of \$15,000, achieved in collaboration with our trusted vendor, Lenovo. Lenovo provided laptops, workstations, monitors, keyboards and other accessories which replicate the suite of products available in professional institutions and will allow the students to interact with industry grade hardware. These devices will play a pivotal role in promoting engagement, ensuring the safe and responsible use of technology, and guarding against cyberbullying.

## JTLeadLikeAGirl Program

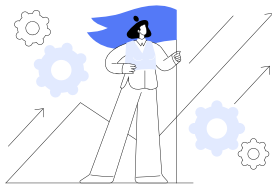

One of the flagship programs we support, in partnership with JT Academy, is the "JTLeadLikeAGirl" initiative. This program is designed specifically for young women, with a focus on nurturing leadership, teamwork, and essential life skills that set the stage for lifelong success. Participants in this eight-month program benefit from interactive and inspirational workshops, gaining insights from industry leaders, and engaging in discussions on setting goals, overcoming challenges, and building self-confidence.

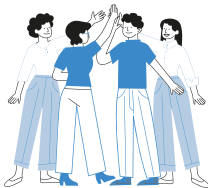

The program covers a wide array of crucial topics, including:

Self-belief

Leadership

Teamwork

Personal and Career Development

Queensland Computers is proud to contribute to the success of this program, ensuring that young women across Queensland have access to opportunities for growth and development.

# INDIGENOUS COLLABORATION

Queensland Computers recognises the rich heritage and unique perspectives of Indigenous communities in Queensland. While our Indigenous collaboration initiatives are in progress, our commitment to respectful and meaningful partnerships with Indigenous groups is unwavering. We are actively working on programs and partnerships that reflect the spirit of reconciliation and acknowledge the importance of Indigenous voices in our endeavours.

## ENVIRONMENT & SUSTAINABILITY

As a responsible corporate citizen, environmental sustainability is a core value embedded in our operations. Our ongoing partnership with Lenovo is a testament to this commitment. Lenovo has been dedicated to sustainability for over a decade, and it has incorporated environmentally friendly processes across its product design, manufacturing, and corporate operations. We believe that protecting the environment is a shared responsibility, and our collaboration with Lenovo ensures that devices are recycled and donated in support of worthy causes.

The devices we donate are not only beneficial for education but also eco-friendly, aligning seamlessly with our dedication to environmental sustainability. We believe that sustainability and technology can coexist harmoniously, and we're actively contributing to this vision.

At Queensland Computers, we are not just a technology solutions provider; we are catalysts for positive change in Queensland. Our unwavering commitment to local jobs, Indigenous collaboration, and environmental sustainability is embedded in our company culture. Our partnership with JT Academy and our support for the JTLeadLikeAGirl program are shining examples of our dedication to shaping a brighter future for Queensland's youth and our community as a whole. Together, we are making a meaningful difference, one device, one student, and one initiative at a time.
